Objective

Frontend developer with a strong background in React, TypeScript, and Git. With 4 years of experience in the frontend development, I've had the privilege of working collaboratively in dynamic teams to craft innovative solutions and deliver exceptional user experiences.

Skills

- React
- TypeScript
- JavaScript
- Git
- Bootstrap
- Chakra UI
- JQuery
- Redux
- SASS

Professional Experience

Technical Officer | Tati technology | March 2023 – Present

- I spearheaded the development of a modular React component library, reducing development time by 30% and fostering code reusability across multiple projects.
- I Implemented processes that improve team efficiency and productiveness.
- I established coding standards and best practices within the team, leading to a 50% reduction in code review time and improved overall code quality.
- I optimized webpack configurations and implemented lazy loading techniques, resulting in a 40% reduction in bundle size and faster initial page rendering.
- I implemented responsive design strategies, resulting in a 50% increase in mobile user engagement and improved accessibility compliance.
- I conducted performance audits using Chrome DevTools and Lighthouse, identifying and resolving critical rendering path bottlenecks, resulting in a 25% improvement in Google PageSpeed Insights scores.
- I conducted thorough testing and debugging to ensure optimal performance across different browsers and devices.
- I contributed to the creation of RESTful APIs for seamless integration with back-end services.

Frontend Developer | Bitpoint Inc | March 2020 – August 2023

- I optimized webpack configurations and implemented lazy loading techniques, resulting in a 40% reduction in bundle size and faster initial page rendering.
- I implemented responsive design strategies, resulting in a 50% increase in mobile user engagement and improved accessibility compliance.
- I conducted thorough testing and debugging to ensure optimal performance across different browsers and devices.
- I contributed to the creation of RESTful APIs for seamless integration with back-end services.
- I implemented version control using Git for efficient code management and collaboration.

Intern Frontend Developer | Fasaha ICT Consultancy | February 2018 – February 2020

- I implemented version control using Git for efficient code management and collaboration.
- I collaborated with cross-functional teams to design and develop responsive and user-friendly websites.
- I utilized HTML, CSS, JavaScript, and various front-end frameworks to implement visually appealing and functional interfaces.
- I engaged with the tech community by participating in discussions, answering queries, and sharing knowledge.
- I utilized HTML, CSS, JavaScript, and various front-end frameworks to implement visually appealing and functional interfaces.

Projects

- <https://sagir-game-hub.vercel.app/> : Developed a responsive Game-hub website using React/TypeScript, Chakra UI and API from rawg.io

Certifications

- Full Stack Web-Developer – freeCodeCamp.org
- Responsive Web design – freeCodeCamp.org
- Front end Development Libraries – freeCodeCamp.org
- JavaScript Algorithm and Data Structure – FreeCodeCamp.org

Education

- National Certificate in Education in Computer Science/Physics | Federal College of Education Yola, Adamawa, Nigeria | 2018
