Objective

Passionate frontend developer with a strong dedication to solving problems through clean, efficient code. Equipped with solid experience in building responsive and user-friendly interfaces using React, TypeScript, HTML, CSS, and JavaScript. Adept at collaborating within cross-functional teams to deliver solutions that meet both technical and client expectations. Strong soft skills in problem-solving, effective communication, and teamwork, seeking to contribute to dynamic projects that drive innovation and growth.

Skills

- React
- TypeScript
- Tailwind CSS
- Git

- Communication
- Problem solving
- Time management
- Team work

Professional Experience

Senior React Frontend Engineer | Zarttech, Full Time | July 2024 - Present

- Contributed to the full software development lifecycle by conducting in-depth code reviews, providing constructive feedback, and driving continuous integration and delivery processes.
- Partnered with content developers to translate UI/UX designs into highly responsive, production-grade web applications.
- Architected and maintained dynamic, state-driven user interfaces using React.js and TypeScript, ensuring optimal performance.
- Ensured flawless responsiveness and cross-device compatibility, implementing best practices for adaptive layouts and performance optimization.
- Leveraged Tailwind CSS to design and implement scalable, maintainable front-end components with a focus on modern styling principles.
- Collaborated with cross-functional teams, utilizing Git for version control, task management, and streamlined codebase management in a CI/CD environment.

Senior Frontend Engineer | RahaPay, Remote | May 2024 – July 2024

- Engineered and implemented dynamic user interfaces for RahaPay's fintech services, including data purchase, airtime purchase, and wallet-to-wallet transfers, following UI/UX design specifications.
- Integrated RESTful API endpoints to display real-time data and enable functionality across the application.
- Optimized the user experience for responsiveness and performance across both mobile and desktop platforms.
- Leveraged React.js, TypeScript, and Tailwind CSS to build scalable, maintainable, and high-performance front-end components.
- Collaborated closely with backend engineers and design teams to ensure seamless delivery of high-quality, production-ready solutions.
- Led codebase management and version control using Git, promoting best practices in collaboration and continuous integration.

Frontend Engineer | Tati technology | March 2023 – April 2024

- Directed and optimized all technical operations, ensuring the company's website maintains full functionality, performance, and scalability.
- Administered and maintained client websites, guaranteeing compliance with high-quality standards and precise alignment with client requirements.
- Implemented website enhancements and updates using HTML, CSS, and JavaScript, ensuring robust performance and responsiveness.
- Collaborated with cross-functional teams to architect and deliver technical solutions that align with business objectives and client expectations.
- Utilized Git for version control, ensuring streamlined collaboration and effective management of code across development projects.

Frontend Engineer | Bitpoint Inc | March 2020 – February 2023

- Enhanced the user interface and user experience of the platform, improving efficiency in managing school operations and activities.
- Acquired hands-on experience in frontend development and client management, specifically within the EdTech domain.
- Delivered technical support to clients, diagnosing and resolving issues related to the school management software with a focus on customer satisfaction.
- Collaborated with senior software engineers to architect and implement features that met client requirements and optimized platform performance.

Intern Frontend Developer | Fasaha ICT Consultancy | February 2018 – February 2020

- Learned essential web development technologies, including HTML, CSS, JavaScript, jQuery, React, and Redux through freeCodeCamp.org.
- Collaborated with fellow interns to discuss concepts and apply new skills in practical projects.

- Participated in web development meetups to expand knowledge and network within the tech community.
- Applied hands-on learning to real-world scenarios, enhancing both technical and teamwork skills.

Projects

- https://zarttech.com/ : Work in a team of frontend developer to create the zarttech official website.
- https://www.rahapay.com/ : Build the RahaPay official website.
- https://www.tatitech.ng/ : Supervised the design of tatitech website.

Certifications

- Full Stack Developer – freeCodeCamp.org
- Front end Development Libraries – freeCodeCamp.org
- JavaScript Algorithm and Data Structure – FreeCodeCamp.org
- Responsive Web design – freeCodeCamp.org

Education

- National Certificate in Education in Computer Science/Physics | Federal College of Education Yola, Adamawa, Nigeria | 2018
